- Transmission: The manual transmission was a 5-speed gearbox, designed for simplicity, durability, and efficiency.
- Dimensions: Approximately 3.4 meters in length, with a width of 1.6 meters, making it ideal for city maneuvering.
- Weight: Around 800-850 kg, depending on the configuration.

Deep Dive into the Manual Transmission System

Design and Components

The manual gearbox in the Renault Twingo 2000 is a straightforward, mechanically operated system. Its main components include:

- Gearbox Housing: Cast aluminum casing containing gears, shafts, and synchronizers.
- Gear Sets: Typically five forward gears and one reverse gear, each comprising gear wheels mounted on shafts.
- Clutch Assembly: A hydraulic or cable-operated clutch that disengages the engine from the transmission during gear shifts.
- Shift Linkages: Mechanical linkages connecting the gear lever to the internal gear selector forks.
- Synchronizers: Friction devices that enable smooth gear engagement by matching gear speeds.

Operational Mechanics

When the driver presses the clutch pedal, it disengages the engine's power from the transmission. Moving the gear lever engages different gear sets through shift forks, which slide gears on their respective shafts to mesh with the corresponding gear wheels. Releasing the clutch then re-engages the engine's power transmission, propelling the vehicle forward in the selected gear.
