Sample Economics Solved Questions and Answers

Question 1: Define the Law of Demand. Explain its exceptions.

Answer: The Law of Demand states that, *ceteris paribus* (all other factors being constant), there is an inverse relationship between the price of a good and the quantity demanded. In simple terms, as the price of a good increases, demand decreases, and vice versa.

Exceptions include:

- **Giffen Goods:** Inferior goods for which demand increases as the price rises, due to income effects.
- **Veblen Goods:** Luxury goods where higher prices increase desirability.
- **Necessities:** Goods with inelastic demand, where demand remains unaffected by price changes.

Question 2: Explain the concept of Price Elasticity of Demand with its types.

Answer: Price Elasticity of Demand measures how much the quantity demanded of a good responds to a change in its price. It is calculated as:

Elasticity = (% Change in Quantity Demanded) / (% Change in Price)

Types of Price Elasticity of Demand:

- **Elastic Demand (Elasticity > 1):** Quantity demanded changes proportionally more than the price.
- **Inelastic Demand (Elasticity < 1):** Quantity demanded changes less than the price change.
- **Unitary Elasticity (Elasticity = 1):** Quantity demanded changes proportionally with price.
- **Perfectly Elastic Demand:** Infinite responsiveness at a specific price.
- **Perfectly Inelastic Demand:** No change in demand regardless of price changes.
