Practical Skills and Scientific Investigations

Practical work is at the heart of OCR's Science GCSEs, fostering hands-on skills crucial for

scientific inquiry. The curriculum incorporates:

- Practical Activities: Experiments, observations, and data collection.
- Mathematical Skills: Data analysis, graphing, and calculations.
- Scientific Investigations: Designing experiments, evaluating results, and understanding safety procedures.

These practical components are essential for developing scientific literacy and underpin the theoretical knowledge gained in lessons.

Assessment Methods and Grading

Assessment Structure

OCR's Science GCSEs employ a combination of written examinations and practical assessments, designed to evaluate a broad range of skills and knowledge.

For Combined Science:

- Two GCSEs: Typically assessed through six exam papers (two for each science), each lasting around 1 hour 15 minutes.
- Content Coverage: Multiple-choice, structured questions, and extended open responses.

For Triple Science:

- Three separate GCSEs: Each with their own set of exams, offering more detailed assessment of individual disciplines.

Practical Endorsement:

- Practical Skills Endorsement: An additional certification based on practical work performed during the course, though it does not contribute to the final grade.

Grading System

- Grades 9-1: The current standard in England, with 9 being the highest.

- Grade Boundaries: Vary for each paper but are designed to differentiate levels of achievement clearly.
- Achievement Levels: Students are awarded grades based on their cumulative performance across all assessments.

Assessment Emphasis:

- OCR emphasizes application and understanding rather than rote memorization, aiming for a more nuanced evaluation of scientific competence.
