Creating a Basic Flexagon

While there are various types of flexagons, the most common is the trihexaflexagon. Here's a simplified process:

- Start with a Hexagonal Sheet: Use Paper P to cut out a hexagon or a strip that can be folded into hexagons.
- Divide into Triangles: Fold the hexagon into smaller triangular sections.
- Create the Flexagon Strips: Fold and glue or tape edges to form a loop, ensuring the faces can be flexed.
- Mark Faces: Use colors or symbols on different sections to track which face is visible after each manipulation.
- Test Flexing: Gently fold along the creases, flexing the paper to reveal different faces.

Note: Specific instructions may vary depending on the type of flexagon you want to build (e.g., trihexaflexagon, octaflexagon).
