Phishing involves sending deceptive emails or messages that appear legitimate to trick individuals into revealing passwords, credit card numbers, or other confidential data. Recognizing phishing attempts is crucial for maintaining online security.

Question 3: Which of the following is a best practice when creating a password?

Options:

- a) Use your birthdate for easy recall
- b) Use a mix of uppercase, lowercase, numbers, and symbols
- c) Keep the same password for multiple accounts
- d) Use simple words or common phrases
